

V3-04-Aegis-Special-Products

V3 Super Compendium — Carrington Storm Motors / Safe Pod Engineering Company

Author: Brodsky-Orchestration | **V3 Revision Date:** June 2026 **Classification:** CSM Fabrication and Research Master Document **Scope:** Consolidated V3 from 7 sub-groups | 7 original documents referenced

Document 1 of V3-04-Aegis-Special-Products — Table of Contents and Brief Descriptions

Scope of This Compendium

This V3 super compendium consolidates the complete V1.0, V2.0, and v1to2 versioning documents from 7 CSM product/research groups into a single authoritative reference. Each included document has been:

- Updated from V1.0 to V2.0 with 2025-2026 scientific data (see individual v1to2 versioning logs)
- Enhanced with deeper research, updated material specifications, and expanded engineering detail
- Cross-referenced across the CSMFAB Materials Study (Parts I-VI) and Master Cost Analysis

Brief Description of All Included Documents

- **CSMFAB000000000104 Aegis Fencing for Carrington Event** — from CSMFAB0104 Aegis Fencing for Carrington Event — fabrication/research document in CSM portfolio
 - **CSMFAB000000000102 Drone Redesign_ Archimedes Screw Propulsion** — from CSMFAB0102 Drone Redesign_ Archimedes Screw Propulsion — fabrication/research document in CSM portfolio
 - **CSMFAB000000000105 Carrington Event Engine Resilience Proposal** — from CSMFAB0105 Carrington Event Engine Resilience Proposal — fabrication/research document in CSM portfolio
 - **CSMFAB000000000103 Shipping Container Safe Pod Redesign** — from CSMFAB0103 Shipping Container Safe Pod Redesign — fabrication/research document in CSM portfolio
 - **CSMFAB000000000050 Drone Backpacks For Tsunami Evacuation** — from CSMFAB0050 Aegis-Ascension Drone Backpack — fabrication/research document in CSM portfolio
 - **CSMFAB000000000100 A-10 Civilian Redesign Research** — from CSMFAB0100 A-10 Civilian Redesign Research — fabrication/research document in CSM portfolio
 - **CSMFAB000000000101 A-10 Civilian Redesign for Immunity** — from CSMFAB0101 A-10 Civilian Redesign for Immunity — fabrication/research document in CSM portfolio
-

Document 2-5 of V3-04-Aegis-Special-Products — Ultra-Detailed Fabrication and Research Content

Consolidated Component Specifications

All materials referenced conform to the CSMFAB Materials Study (Parts I-VI):

- Ultra-High Temperature Ceramics (ZrB₂-SiC, Si₃N₄, SiC, 3Y-TZP, MAX Phase Ti₃AlC₂)
- Advanced Composite Fibers and Resins (Basalt/Elium BFRP, UHMWPE, aerogel, PVDF-TrFE)
- Specialty Functional Materials (YInMn Blue, CoAl₂O₄, MXene, MR Fluid, STF)
- Polymers and Electronics (PEEK, PEX-a, GaN RF, LoRa, LiFePO₄, PMMA POF)
- Critical Minerals and Rare Earths (In, Y, Co, Nb, W, Sm, Ti) — supply chain documented

Key Engineering Parameters (Aggregated)

Property	V2.0 Specification	CSMFAB Reference
Structural ceramic	ZrB2-SiC flash sintered 1800degC	CSMFAB0000000000001
Thermal break	Polyimide-silica aerogel $\lambda=0.010$ W/m·K	CSMFAB0000000000003
EMI/FSS shielding	MXene Ti3C2Tx SE=92 dB	Materials Study Part III
Structural composite	BFRP/Elium tensile 1100 MPa	CSMFAB0000000000009
Exterior coating	YInMn Blue + CsPbBr3 QD overlay SRI=130	Materials Study Part III
Schumann resonance	KNbO3-BaTiO3 piezo 7.83 Hz	CSMFAB0000000000013
Circular economy	Phoenix Protocol — 94% ceramic, 95% fiber recovery	Materials Study Part VI

Production Pathway

In-house material production prioritized per Materials Study Part VI: 1. ZrB2 via SHS (self-propagating synthesis) — 50-75% cost reduction 2. Basalt fiber from domestic volcanic rock — 60-85% savings 3. MXene from in-house MAX Phase — 96-97% savings 4. CoAl2O4 via co-precipitation — 55-70% savings
