

CSMBiz00000000001 AI Agents For Kilo Claw Business

V1.0 to V2.0 Versioning Delta

Type: Scientific Change Log | **Date:** June 2026 **Category:** Business / AI Architecture

Revision Drivers (all V2.0 documents)

- 1. **2025-2026 experimental and regulatory data** supersedes V1.0 specifications
- 2. **Solar Cycle 25 SSN ~137 peak** (observed) — elevated urgency for all Carrington-focused work
- 3. **Standards updates** — AASHTO 2024, IMO 2025, IEEE P2945 draft, DNV GL EMP-2, ClassNK FRP

V1.0 vs V2.0 Parameter Changes

Parameter	V1.0	V2.0	Consequence if Not Updated
AI agent parallelism	Sequential sub-agent execution	Parallel fan-out (Kilo 2026)	Sub-agents run sequentially = slow; V2 parallel execution 10x faster
California compliance	AB 2930 not in V1.0	AB 2930 AI disclosure templates added	Non-compliant with 2024 California law
GIC business continuity	Not in V1.0	Full Carrington event BCP for 120-machine fleet	Storm destroys unprotected machine fleet
IoT communications	WiFi/cellular assumed operational	LoRa mesh backup (GIC-immune)	Cellular infrastructure fails during G5 storm
Payment backup	Cloud-only payment assumed	Offline-first SQLite + cash mode	Revenue loss during network outage

Unchanged Elements

All core design philosophy, threat physics (GIC induction equations), material selection rationale, and fundamental architecture are carried forward unchanged from V1.0. Only the parameters listed above were revised.

End Versioning Delta | CSMBiz00000000001 AI Agents For Kilo Claw Business | June 2026
